

NeuralDesk — Crazy PRD (Personal Founder Intelligence System)

1. Product Overview

Product Name: NeuralDesk

Product Type: Personal Web Application (Private-first)

Primary User: *You (AI-native founder, CS student, builder)*

One-Liner

NeuralDesk is a personal AI-powered control center to track the AI world in real time, discover the best tools, and brutally validate startup ideas before wasting time building them.

Core Philosophy

- Built **for personal leverage**, not mass users (initially)
 - Opinionated > generic
 - Brutally honest > motivational
 - Signal > noise
 - Decision-making > consumption
-

2. Problem Statement

Current Problems

- AI news is fragmented across Twitter, blogs, Discords, and Reddit
- New models and tools launch weekly — impossible to track manually
- No single place to compare models/tools objectively
- Startup ideas are validated emotionally, not logically
- Founders waste months building ideas that already exist or don't monetize

Key Insight

The real bottleneck is not information — it is **clarity and judgment**.

3. Goals & Success Criteria

Primary Goals

- Stay **continuously up-to-date** with AI models, tools, and trends
- Reduce decision fatigue
- Kill bad startup ideas early
- Strengthen good ideas before building

Success Metrics (Personal)

- Daily usage (opens app daily)
 - Time saved vs scrolling
 - Number of ideas killed early
 - Number of ideas improved before execution
-

4. Core Modules (Tabs)

Each module is designed to be **LLM-friendly**, meaning inputs, outputs, tone, and constraints are explicit so AI models understand exactly what to do.

4.1 🗨️ AI News Intelligence Tab

Purpose

Real-time, summarized, high-signal AI news feed.

Features

- Aggregated news from:
 - OpenAI, Anthropic, Google DeepMind blogs
 - HuggingFace
 - arXiv (AI/ML categories)
 - Reddit (MachineLearning, LocalLLaMA)
 - Auto-refresh feed
 - AI-generated TL;DR for each item
- Tags: Model, Research, Tool, Update, Open-source

UI

- Card-based feed
 - Source badge
 - “Why this matters” summary
-

4.2 🙌 AI Models Tracker Tab

Purpose

Single source of truth for AI models.

Data Points

- Model name
- Company
- Type (Text / Multimodal / Video / Audio)
- Context length

- Open-source vs Closed
- Strengths & weaknesses
- Last update date
- Personal rating

Advanced (Later)

- Benchmark comparisons
 - Cost trends
 - Model evolution timeline
-

4.3 🖐️ AI Tools Radar Tab

Purpose

Discover, compare, and replace AI tools intelligently.

Categories

- Coding & Dev
- Image Generation
- Video Generation
- Audio & Music
- Writing & Research
- Vibe / Creative tools
- Experimental / Agents

Tool Card

- Name
- One-line description
- Best use-case
- Category
- Link
- Personal rating
- Status: Active, Replaced, Testing

Smart Feature: Tool Replacement Detection

- Flags newer or better tools
 - Highlights tools outperforming current ones
-

4.4 😓 Startup Idea Power Test (Core Innovation)

Purpose

Brutally validate startup ideas before execution — honesty is prioritized over encouragement.

Required Input Schema (Strict)

- Idea name
- One-liner (max 25 words)
- Problem statement (who hurts and why)
- Target user (specific, not generic)
- Proposed solution (how it works)
- Why AI is needed (optional but evaluated)

Evaluation Stages

Existence Check

- Identify direct competitors
- Identify indirect substitutes
- Identify open-source or big-tech overlap

Output: - Exists / Partially Exists / New - List of references

Market & Timing Test

- Pain intensity (Low / Medium / High)
- Will users actively seek this?
- Is this a "nice-to-have" or "must-have"?

Differentiation Test

- Force one-sentence differentiation
- Flag buzzwords or vague positioning

AI Justification Test

- AI essential / AI optional / AI unnecessary

Monetization Reality Check

- Who pays?
- How much realistically?
- B2C / B2B / Enterprise / Indie

Final Verdict Output (Fixed Format)

- Score: 0–10
- Recommendation: Build / Iterate / Kill
- Brutal summary line (no sugarcoating)

4.5 Idea Graveyard

Purpose

Preserve failed ideas as learning assets.

Data Stored

- Idea summary
 - Why it failed
 - What was learned
 - Future pivots (if any)
-

4.6 Personal Knowledge Vault

Purpose

Your second brain for AI & startups.

Features

- Bookmark news, tools, ideas
 - Add personal notes
 - Tag system (, , ,)
-

4.7 Trends & Signals Dashboard

Purpose

High-level intelligence view.

Insights

- Fastest growing tools
 - Most discussed models
 - Open-source vs closed trends
 - Category heatmap
-

5. Non-Goals (Important)

- Not a social network
 - Not a public news site (initially)
 - Not focused on monetization early
 - Not generic productivity software
-

6. Tech Stack (Suggested)

Frontend

- Next.js
- Tailwind CSS

- Shadcn/UI

Backend

- Supabase / Firebase
- Cron jobs for data refresh

AI Layer

- OpenAI / Claude API
 - Prompt templates stored per module
 - Rule-based scoring + LLM judgment
-

7. MVP Scope (Phase 1)

- ✓ AI News Feed (basic sources + summaries)
 - ✓ Models Tracker (manual → auto later)
 - ✓ Tools Directory (manual curation)
 - ✓ Startup Idea Power Test (core logic)
-

8. Phase 2 & Beyond

- Alerts & notifications
 - Telegram bot
 - Personal pattern detection
 - Public version / invite-only
 - API access
-

9. Long-Term Vision

NeuralDesk evolves into a **personal decision OS** that compounds intelligence over time.

It does not aim to replace thinking — it aims to *sharpen it*.

10. Prompting & Usage Guidelines (Critical)

Tone Instruction for All AI Outputs

- Honest
- Critical
- Non-motivational
- Founder-grade

Global Rules

- Avoid hype language
- Call out weak logic explicitly
- Prefer clarity over kindness

Example System Instruction

"You are NeuralDesk — a brutally honest founder assistant. Your job is to reduce wasted effort, not to encourage ideas."

Usage Principle

NeuralDesk is designed to be used **daily**, briefly, and decisively.

11. Final Note

This PRD is intentionally intense, opinionated, and personal. It is optimized so **LLMs understand intent, constraints, tone, and expected output** without ambiguity.

NeuralDesk is not a product yet — it is an advantage system.
